

Rejuvenating cure with constant smoothness warranty

RENEWAL TOPS

When cement concrete is constantly exposed to wind and weather it becomes porous and cracked over the years. The playing surface gradually washes out and any absorbed water can freeze and so damage and crack the surface, making it uneven and unplayable. That means no fun and the end of the table tennis table.

Such damage can easily be renewed again by replacing the table tennis surface with our Renewal Tops of polymer concrete. This process is the most cost effective and quickest method of bringing back the fun of playing table tennis.

Smooth game

The renewal enables a new and absolutely even, porefree and smooth playing surface with an almost lifelong durability, without having to dismantle and dispose the old concrete table.

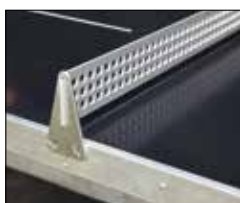

MADE IN
GERMANY

Rough, uneven playing surface of an old concrete table tennis table

First step of renewal: one new Renewal Top is fitted

After an approximate time of 1 hour work the old table tennis table is ready for use again

- Material: Polymer Concrete
- Precise fine layered playing surface without pores
- UV- and frost resistant material assures a high quality wear and tear less and durable playing surface
